KidPub Press Announces Publication of *Christmas and Commitment Go Together*
by 8-Year-Old Author Trisha Prabhu

North Attleboro MA, 25 November 2008 – *Christmas and Commitment Go Together*, a new book by 8-year-old author Trisha Prabhu, has been published by KidPub Press. Prabhu's book, her first, is a delightful holiday story that illustrates the true meaning of Christmas as discovered by two young orphans. Along the way the girls find out why it's often true that it's better to give than to receive. The young author attends the Arlene Welch Elementary School in Naperville, Illinois.

Trisha Prabhu started writing at an early age. "I write a lot of stories during my free time, and I have published a story, *Shortcut Virginia*, on KidPub," she said, when asked how it felt to have published her first book. "I have been wanting to publish a real book since I was 6, my dream finally came true, this is so exciting!"

The young author's work was published by KidPub Press, an imprint devoted to producing books written by children. "We believe that confidence in writing is a trait that is a key to success as an adult," said publisher Perry Donham. "KidPub gives kids a place to be creative with the written word while having fun at the same time in a vibrant community of young writers."

Christmas and Commitment Go Together is available for purchase on Amazon.com, at KidPub's online bookstore, and at Anderson's Bookshop in downtown Naperville, Illinois. To read new stories written by kids, posted daily, visit www.kidpub.com.

ABOUT KIDPUB: Founded in 1995, KidPub is the oldest and largest Internet entity devoted to encouraging literacy in children. It offers several programs, including writing contests, school participation, posting of stories, poems, and other creative work, and operates KidPub Press, which publishes paperback books written by young authors. KidPub may be found on the web at www.kidpub.com.
